

Virus Wars

PLOG – 2018

Ângelo Miguel Tenreiro Teixeira – 201606516

Henrique Melo Lima – 201606525

Descrição

O jogo é baseado na expansão de vários vírus tendo sido criado algures nos anos 80.

Regras

É jogado por dois jogadores – azul e vermelho - cujo objetivo é deixar o oponente sem jogadas possíveis.

Começando pelo azul, os jogadores têm 5 jogadas por turno, sendo que cada jogada pode ser de 2 tipos:

- Colocar um vírus numa célula acessível vazia no tabuleiro
- Absorver – *zombificar* - um vírus oponente em qualquer célula acessível do tabuleiro, p.ex. trocar um vírus adversário por um estado *zombificado* da cor do jogador, que fica permanente até ao fim do jogo, não podendo ser “acordados”, “recuperados” ou removidos do tabuleiro

Uma célula é acessível se:

- Está verticalmente, horizontalmente ou diagonalmente adjacente a um vírus já presente do jogador no tabuleiro, mesmo tendo sido colocado num mesmo turno
- Está verticalmente, horizontalmente ou diagonalmente adjacente a um conjunto de zombies ligados da cor do jogador, mesmo que os zombies tenham aparecido no mesmo turno
